Answer Key

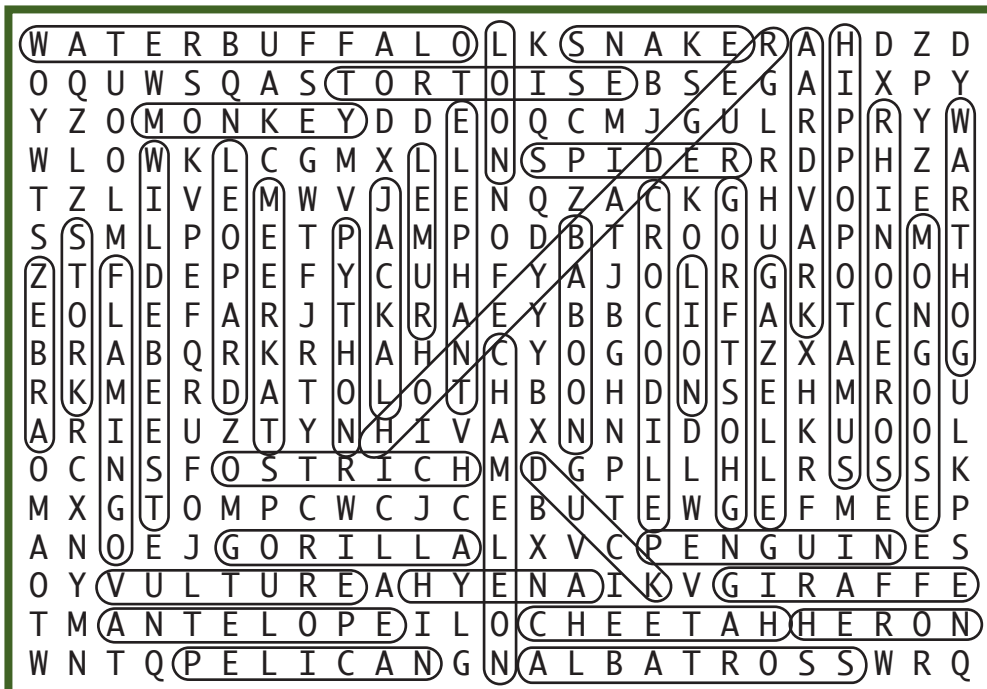

Do you know that Africa has more kinds of animals than any other continent? It is one of the largest continents with 20% of the earth's land – 11.6 million square miles. There are many kinds of environments there – from jungles to deserts, from savannas to coastline. What do you think you would see if you went on an animal-watching trip or safari there?

Animals of Africa

Can you find and circle all of these animals and birds that live in Africa?

- | | | | | |
|----------|-----------|--------------|---------------|------------|
| warthog | chameleon | rhinoceros | leopard | penguin |
| tortoise | monkey | giraffe | wildebeest | loon |
| hyena | crocodile | gazelle | water buffalo | albatross |
| elephant | spider | hippopotamus | gorilla | pelican |
| duck | lion | meerkat | honey badger | ghost frog |
| vulture | snake | python | lemur | heron |
| aardvark | cheetah | zebra | mongoose | stork |
| baboon | jackal | antelope | ostrich | flamingo |

Hey! I can see my name in there...can you see it too?
